

## Cytori Reports Q2 2018 Business and Financial Results

August 14, 2018

SAN DIEGO, Aug. 14, 2018 (GLOBE NEWSWIRE) -- [Cytori Therapeutics](#) (NASDAQ: CYTX) ("Cytori" or the "Company") today announced Q2 2018 financial results and provided updates on corporate activities.

Q2 2018 net loss was \$3.7 million, or \$0.59 per share. Operating cash burn for Q2 was approximately \$2.7 million. Cytori ended Q2 with approximately \$3.1 million of cash and cash equivalents, or approximately \$8.8 million pro-forma at June 30, 2018, when considering \$5.7 million in net cash proceeds received from a public rights offering which closed on July 25, 2018.

Cytori is developing for manufacture its lead chemotherapeutic drug, ATI-0918, a generic version of pegylated liposomal doxorubicin hydrochloride, with the goal of demonstrating bioequivalence to the European reference drug. Our Nanomedicine team in San Antonio, Texas continues to complete activities in support of a Marketing Authorization Application (MAA) to be filed with the European Medicines Agency (EMA) next year. The Company also continues to engage potential commercial partners for ATI-0918 in Europe, Middle East, North Africa, North America, and Asia Pacific. Furthermore, for Cytori's ATI-1123 chemotherapy drug product candidate, an albumin-stabilized pegylated liposomal docetaxel, the Company has requested an orphan drug designation from FDA for small cell lung cell cancer and is evaluating the FDA's 505(b)(2) new drug application (NDA) pathway in the U.S. which may offer accelerated and lower cost development.

Our Cell Therapy team is awaiting data readouts from clinical trials in scleroderma and urinary incontinence and is actively conducting a clinical trial in thermal burns. 6 month data from the 40 patient, French SCLERADEC II clinical trial (scleroderma) is expected before the end of 2018 and 1 year data from the 45 patient, Japanese ADRESU clinical trial (urinary incontinence) is expected in early 2019. Finally, U.S. FDA has approved a protocol amendment for the RELIEF thermal burn injury trial sponsored by BARDA intended to facilitate enrollment. Cytori completed a successful In-Process Review meeting with BARDA this past June. Thus far, Cytori and BARDA have initiated 2 of 8-10 anticipated U.S. clinical sites.

In Japan, Cytori continues to see favorable growth trends in the use of its commercially approved cell therapy products in the aesthetic and orthopedic markets. The Company remains on track to see continued double digit year over year growth in consumable utilization.

"Our primary corporate objective is to file for European market approval for ATI-0918, our lead oncology drug product. We have also expanded the development of our pipeline drug, ATI-1123, in the U.S. and we are priming it for phase II evaluation." said Dr. Marc Hedrick, President and Chief Executive Officer of Cytori. "We are also pleased with the quarter-over-quarter and year-over-year results of our commercial Cell Therapy efforts in Japan that are primarily focused on consumable utilization. This provides a growing business and infrastructure in anticipation of the SCLERADEC-II and ADRESU trials, in 2018 and 2019, respectively."

### Q2 2018 and year-to-date Financial Performance

- Q2 2018 and year-to-date operating cash burn was \$2.7 million and \$6.8 million, compared to \$5.0 million and \$9.9 million for the same periods in 2017, respectively.
- Q2 2018 and year-to-date total revenues were \$1.6 million and \$3.2 million, compared to \$1.5 million and \$3.1 million for the same periods in 2017, respectively.
- Q2 2018 and year-to-date consumable utilization in Japan grew by over 70% and 60%, when comparing to the same periods in 2017, respectively.
- Cash and debt principal balances at June 30, 2018 were approximately \$3.1 million and \$13.0 million, respectively.
- Q2 2018 net loss was \$3.7 million or \$0.59 per share, compared to a net loss of \$6.0 million or \$1.94 per share for Q2 2017.
- Year-to-date net loss was \$8.1 million or \$1.32 per share, compare to an adjusted net loss of \$13.6 million or \$5.04 per share for the same period in 2017, respectively.

### Selected Key Anticipated Milestones:

- Complete ATI-0918 development and manufacturing required to prepare and file a MAA with the EMA.
- Receive Orphan Drug Designation and 505(b)(2) pathway feedback from the U.S. FDA for ATI-1123.
- Enroll burn patients in BARDA-funded U.S. RELIEF clinical trial.
- Report 3 and 6 month French SCLERADEC II clinical trial data for scleroderma hand dysfunction.
- Report 1 year Japanese ADRESU clinical trial data for post-surgical male stress urinary incontinence.

### Management Conference Call Webcast

Cytori will host a management conference call at 5:30 p.m. Eastern Time today to further discuss its progress. The webcast will be available live and by replay two hours after the call and may be accessed under "Webcasts" in the [Investor Relations section](#) of Cytori's website. If you are unable to access the webcast, you may dial in to the call at +1.877.402.3914, Conference ID: 4075028.

### About Cytori

Cytori is developing, manufacturing, and commercializing nanoparticle-delivered oncology drugs and autologous adipose-derived regenerative cell

(ADRC) therapies within its Nanomedicine™ and Cell Therapy™ franchises, respectively. Cytori Nanomedicine™ is focused on the liposomal encapsulation of anti-neoplastic chemotherapy agents, which may enable the effective delivery of the agents to target sites while reducing systemic toxicity. The Cytori Nanomedicine™ product pipeline consists of ATI-0918 pegylated liposomal doxorubicin hydrochloride for breast cancer, ovarian cancer, multiple myeloma, and Kaposi's sarcoma, a complex/hybrid generic drug, and ATI-1123 patented albumin-stabilized pegylated liposomal docetaxel for multiple solid tumors. Cytori Cell Therapy™, prepared within several hours with the proprietary Celution® System and administered to the patient the same day, has been shown in preclinical and clinical studies to act principally by improving blood flow, modulating the immune system, and facilitating wound repair. As a result, Cytori Cell Therapy™ may provide benefits across multiple disease states and can be made available to the physician and patient at the point-of-care. For more information, visit [www.cytori.com](http://www.cytori.com).

#### Cautionary Statement Regarding Forward-Looking Statements

This press release includes forward-looking statements that involve known and unknown risks and uncertainties. All statements, other than historical facts are forward looking statements. Such statements, including, without limitation, statements regarding anticipated commercial launch of our ATI-0918 drug candidate (and timing thereof); completion of manufacturing activities necessary to submit an MAA to the EMA for our ATI-0918 drug candidate; are subject to risks and uncertainties that could cause our actual results and financial position to differ materially. Some of these risks include clinical, pre-clinical and regulatory uncertainties, such as those associated with conduct and completion of the Company-sponsored RELIEF thermal burn trial, as well as the Company's anticipated submission of data to the EMA from the previously completed bioequivalency trial for ATI-0918. We also face risks that investigator-initiated trials using our Cytori Cell Therapy fail to fully enroll or otherwise are conducted in a manner that ultimately is injurious to our business. We also face the risk that we will be unable to time successfully manufacture our ATI-0918 drug candidate in time to meet our projected timeline for submission of an MAA to the EMA, or at all. Some of these risks also include risks relating to regulatory challenges the Company faces (including the U.S., EU, China, Japan and its other key geographies) due to a number of factors including novelty of the Company's technology and product offerings, changes in and /or evolution of regulatory approaches to cellular therapeutics like the Company's in its key geographies, and similar matters. It is possible that the Company could face unexpected revenue shortfalls, expense increases or other occurrences that adversely affect our cash burn and cash management strategies. Further the Company face risks pertaining to dependence on third party performance and approvals (including performance of investigator-initiated trials, outcome of BARDA's review of the Company's proposed burn wound trial pursuant to its contract with BARDA, and outcome of the EMA's review of our ATI-0918 MAA); performance and acceptance of the Company's products in clinical studies/trials and in the marketplace (including commercial acceptance of the Company's products in Japan and other markets where are products are commercially available, and similar risks); material changes in the marketplace that could adversely impact revenue projections (including changes in market perceptions of the Company's products, and introduction of competitive products); unexpected costs and expenses that could adversely impact liquidity and shorten the Company's current liquidity projections (which could in turn require the Company to seek additional debt or equity capital sooner than currently anticipated); the Company's reliance on key personnel; the Company's ability to identify and develop new programs or assets to expand the Company's clinical pipeline; the right of the U.S. government (BARDA) to cut or terminate further support of the thermal burn injury program (including any decision by BARDA not to proceed with our proposed thermal burn trial); the Company's abilities to capitalize on its internal restructuring and achieve break-even or profitability (or to continue to reduce our operating losses); and other risks and uncertainties described under the "Risk Factors" in Cytori's Securities and Exchange Commission Filings, included in the Company's annual and quarterly reports.

There may be events in the future that the Company is unable to predict, or over which it has no control, and its business, financial condition, results of operations and prospects may change in the future. The Company assumes no responsibility to update or revise any forward-looking statements to reflect events, trends or circumstances after the date they are made unless the Company has an obligation under U.S. Federal securities laws to do so.
